Impact and reach from article originally published in the Can. J. Soil Sci in 1998 but added to IR in Nov 2011

"Literature which is **freely available on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, ... without financial, legal, or technical barriers** ... The only constraint on reproduction and distribution, and the only role for copyright in this domain, should be to give authors control over the integrity of their work and the right to be properly acknowledged and cited."

(Budapest Open Access Initiative, 2001)
